deltathree's Reseller Program is the answer when it comes to providing turnkey Internet telephony solutions to Internet/cyber cafes, call shops and centers, calling card providers, Internet service providers and local software/hardware distributors. We provide competitive rates for worldwide calling broadband products with a variety of calling features.

At deltatthree, we've built a complete line of solutions that allow you to increase your revenue streams, And differentiate yourself from your competitors.

Broadband Solution

Innovative Products

As a deltatthree partner, you can choose from two profitable purchasing options. With our Pre-Paid Retail Program, you purchase Calling Accounts and receive commissions based on your investment level. For our larger partners, we offer a Pre-Paid Wholesale Program where you provide an initial minimum pre-payment and enjoy the benefits of low wholesale rates as well as the flexibility to determine your customers' retail rates.

Let us put our experience of over a decade to work for you. We'll keep you ahead of the game.

Turnkey VoIP Solutions

deltathree's Reseller Program offers you one-stop shopping for access points, telephony network, support services and tools. We provide complete Internet telephony solutions that are easy to implement and specifically tailored for your success.

At deltathree, we're constantly developing new products, applications and technologies that enable you to meet your customers' needs.

Support Services & Tools

deltathree's ultimate objective is to deliver the very best support to our customers. As our partner, you will have the full support of a dedicated Sales Manager and Sales Coordinator, as well as an experienced technical team. deltathree has also developed web-based tools to help you support your customers. Through our Reseller Center, you will have access to our support services, including a Customer Service Interface (CSI) to manage customer accounts, an Online Analytical Processing (OLAP) tool to analyze customer trends, and direct access to our 24/7 Network Operations Center (NOC) to resolve technical issues.

Hardware & Software

At deltathree, we provide a variety of advanced access points to allow your customers to place and receive low-cost, premium quality calls to and from anywhere worldwide. Our hardware supports multiple Internet connections for both broadband and dial-up users. deltathree's customizable Mobile and PC Phone Dialer with a dynamic VPN is easy to install and provides a user friendly interface, while our IP Phones allow your customers to make VoIP calls without using a computer. Our multiple port gateways are optimal solutions for call centers and Internet cafes, as well as for remote access services, such as SMS CallBack, Tel CallBack, and your own Calling Card Platform. Together, our web tools and technical team will guide you every step of the way through the installation and configuration process.

Network & Telephony

deltathree manages one of the world's first and most advanced Session Initiation Protocol (SIP) networks to provide you with the highest quality Internet telephony and the most advanced features. Our open architecture infrastructure ensures that our network services can be fully accessed and utilized with any SIP device. deltathree's robust network enables users to make and receive VoIP calls to and from any destination worldwide. Along with low international rates, we provide a wide variety of special phone features, such as Caller ID, Call Waiting, Voicemail, Call Forwarding and many more.

Website

Provide your customers with our End User Interactive Center (IC) to manage their accounts and features. Using this web interface, they can view account balance information and Call Detail Records (CDRs), manage their features, recharge their accounts, use Web CallBack and more.

Customization

At deltathree, we give you the ability to offer complete VoIP solutions under your brand name and customize our products to reflect your individual look and feel. Our PC Phone Dialer can have your unique design, while our End User Interactive Center (IC) can be embedded into your website using your own colors and fonts. In addition, our Interactive Voice Response (IVR) system can be configured in your chosen language and voice.

Billing

With vast experience in billing, deltathree offers an extremely flexible billing system that provides a broad range of pricing features, enabling you to increase profits and broaden your product offering. Our system authenticates your customers based on their unique userID and password, and determines their ability to place calls based on balance and dial plans. With a minimum investment, you can determine your own retail price plans and take advantage of a wide variety of billing features, such as per minute charges, rounding, access fees and monthly recurring charges.

Reporting

Our Online Analytical Processing (OLAP) tool provides real-time data on every aspect of your VoIP solution. Using this tool, you can create your own reports to obtain important information, including revenues, customer trends, calling patterns, and much more.

When looking for a turnkey VoIP solution, join deltathree's Reseller Program. We're changing the way the world communicates.
